**Product Overview 2019**

**Global Support**

**Oil Sealed Vacuum Pumps**

**Leybold**
Consulting, sales and service

![Image of a man on the phone]

Your partner for vacuum engineering. Benefit from our worldwide support.

**Your Expectations:**
- First-class consulting
- Excellent product quality at optimized price-to-performance ratio

**Our Solution:**
- Worldwide sales and service network
- Highly qualified and committed staff
- Comprehensive consulting services
- Customer specific application support
- Highly reliable, top quality solutions
- Competitive pricing
- Certified in accordance with DIN ISO 9001/9002
- After sales, application and production support

---

**SOGEVAC B/BI/D/DI**

Single-stage rotary vane pumps

![Image of SOGEVAC B/BI/D/DI pumps]

Effective investment, long service life. No oil loss, low power consumption.

**Your Expectations:**
- Industrial rough vacuum generator
- Favorable price-to-performance ratio
- High reliability
- ATEX explosion protection, optionally

**Our Solution:**
- Pumping speed 10 to 1,200 m³/h
- Ultimate pressure ≤ 5 · 10⁻² mbar
- O₂-compatible versions
- Separate standard product line for the food and packaging applications
- Flexible pump design
- Certified according to ATEX RL 2014/34/EU
Product Overview 2019
Oil Sealed Vacuum Pumps

SOGEVAC NEO D
Medium vacuum rotary vane pumps

No oil loss thanks to integrated exhaust filter. Effective investment. Maintenance free, up to 3 years in clean applications.

Your Expectations:
- Low cost medium vacuum pumps
- No oil loss at exhaust
- Longest possible maintenance intervals
- Monitoring possibilities
- Broad portfolio, also for special demands (e.g. O₂, ATEX)

Our Solution:
- Pumping speed 16 to 76 m³/h, all sizes available for single or 3 phase power supply
- Ultimate pressure ≤ 8 x 10⁻³ mbar
- Integrated exhaust filtration. Patented and best in class.
- Use of long lifetime oils and dynamic shaft seals
- O₂-compatible versions
- Certified according to ATEX 2014/34/EU versions Cat 2 or 3
- Flexible pump design for accessories retrofit or dedicated customer variants

TRIVAC B, E and T
Dual-stage rotary vane pumps

A well-proven vacuum pump for long-term operation lasting for years. Broad range of accessories.

Your Expectations:
- Rugged vacuum generator
- High reliability
- ATEX explosion protection, optional

Our Solution:
- Pumping speed
  TRIVAC B: 4 to 65 m³/h
  TRIVAC E: 2.5 m³/h
  TRIVAC T: 4 to 30 m³/h
- Ultimate pressure
  TRIVAC B: 10⁻¹ mbar
  TRIVAC E: 2 x 10⁻³ mbar
  TRIVAC T: 5 x 10⁻³ mbar
- For medium and high vacuum applications
- Economic OEM product range (TRIVAC T)
- Certified according to ATEX RL 2014/34/EU (TRIVAC B)
Product Overview 2019
Dry Vacuum Pumps

SCROLLVAC SC / plus
Oil-free scroll pumps

Dry, universal solution, low operating costs.

Your Expectations:
- Oil-free vacuum pump
- Quiet, low vibration operation
- Long maintenance intervals

Our Solution:
- Pumping speed 5 to 60 m³/h
- Ultimate pressure ≤ 1 · 10⁻² mbar
- Robust, low-maintenance design
- High pumping speed even at 1000 mbar

ECODRY plus
Dry compressing multi-stage roots pumps

Compact vacuum pumps with low noise emission for clean applications.

Your Expectations:
- Noise-free and clean environment
- Easy handling
- High energy-efficiency
- Maintenance-free pump

Our Solution:
- Pumping speed 40 to 65 m³/h
- Lowest noise level in class
- Air-cooled pump
- Oil and particle-free operation

CLAWVAC
Oil free claw pumps

Compact rough vacuum pump for demanding industrial applications including handling of particle and vapor contaminated gases. Trouble-free and cost-saving.

Your Expectations:
- Robust, oil-free vacuum pump for clean vacuum generation
- Long maintenance intervals

Our Solution:
- Pumping speed 65 to 300 m³/h
- No oil migration into process, no oil contamination to the environment
- Extremely efficient air cooling, low heat emission. No cooling water required.
- Corrosion resistant stainless steel claws
- Simple and easy to clean on-site
- Up to 50% energy saving by operation with variable speed drive
Product Overview 2019
Dry Vacuum Pumps

VARODRY
Dry compressing screw pumps

Compact, rugged oil-free vacuum pumps for general industrial applications.

Your Expectations:
- Industrial vacuum generator
- Low investment and operating costs
- High reliability and long system uptimes

Our Solution:
- Pumping speed 65 and 100 m³/h
- Ultimate pressure ≤ 1 · 10⁻² mbar
- Fully air-cooled design, no need for water cooling
- Minimum maintenance demands
- Most robust pump design

LEYVAC
Dry compressing screw pumps and systems

Rugged vacuum pumps for rough applications and high process throughputs. Simple vacuum performance upgrade with RUVAC roots pumps.

Your Expectations:
- Industrial vacuum generator
- Long system uptimes
- High pumping speed already at atmospheric pressure

Our Solution:
- Pumping speed 80 to 160 m³/h
- Ultimate pressure ≤ 1 · 10⁻² mbar
- Hermetically sealed pump
- Direct connection of RUVAC Roots pumps via adapter
Product Overview 2019
Dry Vacuum Pumps

DRYVAC
Dry compressing screw pumps and systems

Rugged, compact vacuum solutions with smart monitoring and control system for coating, photovoltaic and process industry applications.

Your Expectations:
- Maximum system availability
- Low cost of ownership
- Minimum footprint
- Self protection of the pump and easy communication

Our Solution:
- Pumping speed 200 to 9.800 m³/h
- Ultimate pressure
  - DRYVAC pumps: from 0.01 to 5 · 10⁻³ mbar
  - DRYVAC SYSTEMS: from 0.01 to 5 · 10⁻⁴ mbar
- Robust design for demanding processes
- Highest energy efficiency
- Flexible modular system for compact vertical and horizontal installation
- Variants with ATEX certification according to ATEX directive 2014/34/EU, Cat. 2i available (DV 650 and DV 1200), DV 300 with CTEX Kat 3i, T3
- Integrated smart monitoring of major parameters; i-versions with touch screen control and digital I/O interface (optional Profibus, Profinet)

DRYVAC Energy Saver
Power saving unit for DV 450 / DV 650 and DS systems

Fast ROI (approx. 1 year) with power savings up to 50%.

Your Expectations:
- Cost savings through reduction of energy consumption
- Improved ultimate pressure

Our Solution:
- Power savings up to 50%
- Ultimate pressure improvements in the 10⁻⁴ mbar range
Product Overview 2019
Dry Vacuum Pumps
Roots Vacuum Pumps

SCREWLINE
Dry compressing screw pumps

Extremely robust for harshest industrial applications, simple on-site maintenance.

Your Expectations:
- High pumping speed
- Easy to clean
- Air cooled
- ATEX explosion protection (Cat. 2i)

Our Solution:
- Pumping speed 250 and 630 m³/h
- Ultimate pressure ≤ 1 · 10⁻² mbar
- Expandable to pump systems by adding Roots pumps
- Monitoring system
- Easy to disassemble pump chamber for rapid cleaning
- Certified according to ATEX RL 2014/34/EU

SCREWLINE
Dry compressing screw pumps

RUVAC WA(U)/WS(U)
Roots blowers

Long-lasting and reliable. Easy connection to any forevacuum pump.

Your Expectations:
- Pumping speed increase at low pressures
- Simple to use
- Oil-free pumping of the gas
- ATEX explosion protection

Our Solution:
- Pumping speed range from 250 to 4,000 m³/h
- Reliable and robust
- Available with flanged motor or with hermetically sealed drive motor
- Suitable for 100% O₂ applications
- Certified according to ATEX RL 2014/34/EU
Product Overview 2019

Roots Vacuum Pumps
Fluid Entrainment Pumps

RUVCAC WH(U)
Roots blowers

An innovative product line, efficient and cost-effective for use in modern Process Industry applications.

Your Expectations:
- Flexible pumping speed through frequency converter operation
- Rapid pumpdown times
- Compact design
- Oil-free pumping of gases
- System compatibility
- Low current consumption

Our Solution:
- Pumping speed from 720 to 9,800 m³/h (with frequency converter)
- Excellent performance and consumption specifications
- Hermetically sealed drive motor
- Small footprint
- Innovative bypass valve
- Certified according to ATEX RL 2014/34/EU, partially also according to ATEX Cat 2i
- Direct connection of large forevacuum pumps via adapter

Oil Booster OB
Oil vapor jet pumps

Long maintenance intervals, wear-free. High safety standard.

Your Expectations:
- High vacuum
- Very high critical backing pressure capability
- High pumping speed
- Safe and economic
- CE compliant electronics power supply

Our Solution:
- Pumping speed: 6,000 to 18,000 l/s
- Operating range: < 10⁻¹ to 10⁻⁴ mbar
- Stable pumping speed in low pressure ranges
- No wear by revolving parts
- Small footprint
- Simple operation
Product Overview 2019
Fluid Entrainment Pumps
Controller for Fluid Entrainment Pumps

**DIP / DIJ / LEYBOJET**
Oil diffusion pumps

Long maintenance intervals, wear-free, high safety standards.

**Your Expectations:**
- Stable high vacuum
- High critical backing pressure capability
- High pumping speed
- Safe and economic
- CE compliant electronics power supply

**Our Solution:**
- Pumping speed:
  - DIP: 3,000 to 50,000 l/s
  - DIJ: 2,800 to 28,000 l/s
  - LEYBOJET: 12,000 l/s
- Operating range:
  - DIP: $10^{-2}$ to $10^{-7}$ mbar
  - DIJ: $10^{-2}$ to $10^{-7}$ mbar
  - LEYBOJET: $10^{-2}$ to $10^{-8}$ mbar
- Optimum pumping speed in the pressure range $10^{-4}$ mbar (DIP, DIJ) and $10^{-2}$ to $10^{-3}$ mbar (LEYBOJET)
- No wear by revolving parts
- Simple operation
- Suited for application in sputtering processes (LEYBOJET)
- Innovative power efficiency controller (ROI < 2 years)

**Power Efficiency Control**
Control unit for oil diffusion pumps and OB pumps

Fast ROI (< 2 years) with power savings up to 30%.
Easy and convenient to use. Optimized power and oil consumption data.

**Your Expectations:**
- Cost savings through reduction of energy consumption
- Simple to use
- PLC controlled

**Our Solution:**
- Power savings up to 30%
- Improved service life for the oil and the heating cartridges
- Simple visual monitoring of the parameters through graphic user interface
- Equipped with USB interface and Ethernet
Product Overview 2019
Turbomolecular Pumps

TURBOVAC i/iX
Turbomolecular pumps with hybrid bearing technology

Innovative and flexible product range with outstanding performance data and integrated electronics.

Your Expectations:
- Clean high and ultrahigh vacuum generation
- Long service life
- Ease of installation and operation
- Reliable usage under the most varied applications and operation conditions

Our Solution:
- Pumping speed up to 440 l/s
- Oil free hybrid bearings (mechanical/permanent magnetic)
- Installation in any orientation
- Integrated electronics including a variety of options for communication and control of accessory components
- Versions for high compression and high gas throughputs available
- TURBO.CONTROL i display unit (optionally as rack version or benchtop unit) to control and monitor the pump including connection facility for two pressure gauges available as accessory.

TURBOVAC MAGiINTEGRA
Turbomolecular pumps, magnetically levitated

Most compact product line for industrial applications. On-board frequency converter and power supply. Easy and space-saving system integration.

Your Expectations:
- Clean high and ultrahigh vacuum generation
- Suitable for industrial use, like PVD and coating processes, display and glass coating
- Insensitivity to particles or deposits
- Low maintenance requirements

Our Solution:
- High pumping speed and high compression ratios for all gases
- Holweck stage incorporated
- Resistant to particles and deposits
- Insensitive to shock-venting
- Monitoring and self-protection functions
- Maintenance-free in most applications
Product Overview 2019
Cryo Pumps, Cold Heads

COOLVAC
Refrigerator cryo pumps

High water vapor pumping capability, long maintenance intervals, installation in any orientation.

Your Expectations:
- Hydrocarbon-free vacuum
- High and ultrahigh vacuum generation

Our Solution:
- Pumping speed up to 60,000 l/sec
- DN ISO, CF and ANSI flange versions
- Two cryo pump versions for manual and for fully automatic system control and regeneration available
- Pump controller mounted on pump for fully automatically controlled iCL version for easy process and network system integration

COOLPOWER
Cold heads for cooling cryo pumps/cryostats

Gas refrigerating machines for cryogenic temperature generation based on the Gifford-McMahon principle. Designed for cooling superconductors (magnets, samples) from medicine and research.

Your Expectations:
- High refrigerating capacity
- Small footprint
- Long maintenance-free operating time
- Low vibrations

Our Solution:
- Ultimate temperatures:
  two-stage models down to 8 K
  single-stage models down to 25 K
- High refrigerating capacity from the smallest volume:
  up to 18 W @ 20 K and up to 110 W @ 80 K for double stage coolers
  up to 250 W @ 80 K for single stage coolers possible
- Resistant to particles and deposits
- Simple operation by key-press
- No need for liquid helium and liquid nitrogen
A full range of vibration-free and maintenance-free ion pumps, Titan sublimation pumps and NEG getter pumps to achieve best final pressures in the ultra-high vacuum.

**Your Expectations:**
- High pumping speed at excellent final pressure
- Hydrocarbon-free vacuum
- Long operating time

**Our Solution:**
- Pumping speed 0.2 - 1,200 l/s
- Ultimate vacuum $< 1 \times 10^{-10}$ mbar
- Various TiTan™ pump elements for different requirements available:
  - TiTan™ CV with two cathodes for pumping air and non-noble gases
  - TiTan™ DI with two elements for pumping air and noble gases (Titan- and Tantalum)
  - TiTan™ TR - classic triode elements at higher operating pressures
- All TiTan™ and TSP components are bakeable up to 400 °C
- Wide range of accessories
- DIGITEL™ controller models for operation of ion pumps and TSPs in most diverse applications and configurations
- HV cables are available to connect your digital controller and ion pump
Product Overview 2019
Vacuum Gauges, Vacuum Controllers

Measuring Instruments
Vacuum gauges and pressure gauges

Reliable monitoring and control for all vacuum processes.

Your Expectations:
- Gauge systems for every application
- Precise pressure measurement of gases and vapors
- Reproducibility across a wide pressure range

Our Solution:
- Measurement with active and passive sensors in a pressure range from $10^{-12}$ to 2,000 mbar for every application
- Intuitive operation and flexible data retrieval
- Pressure switches and pressure control instruments
- Handheld versions for easy and reliable pressure measurements
- DAkkS or factory calibration of vacuum gauges in the pressure range from $10^{-8}$ to 1,000 mbar

GRAPHIX
Vacuum controller

Universal controllers for the connection of active vacuum sensors for direct pressure measurements in the range of $10^{-10}$ mbar to 2,000 mbar

Your Expectations:
- Operation and control of the entire vacuum system
- Simple handling and operation (plug & play)
- Fast process data accumulation and transfer via USB to PC

Our Solution:
- Monitoring and control of the entire vacuum process
- Product range with 1, 2 or 3 measurement channels
- 3.5" TFT touchscreen display with intuitive user interface
- Easy to read curve or bar graph display
- Internal and external data-logging (USB port on the front) for configuration and real-time measurement data
- Readout selectable between mbar, Torr, Micron, Pascal, Psi
- Option to connect active vacuum gauges from various brands
PHOENIX 4
Leak detectors

The PHOENIX 4 product range sets new standards in Helium leak detection. Our product portfolio provides the perfect matching unit for every application.

Your Expectations:
- Non-destructive components testing for quality assurance
- Reliable technology
- Highest measurement reliability and accuracy
- Professional consulting and support

Our Solution:
- Suitable for mobile or stationary vacuum and sniffer operation
- Quick start-up, high measurement accuracy
- Internal data logging and simple external data acquisition via USB
- Intuitive HMI with simple controls, menu structure and user friendly multicolored touchscreen
- Integrated webservice featuring easy login via Wi-Fi for remote control with any internet-enabled smartphone or tablet

LEYSPEC
Residual gas analyzers

All-in-one devices with integrated control and display for demanding test procedures and residual gas analysis in high vacuum systems, general gas analysis in research and industry or for environmental tracking.

Your Expectations:
- Most accurate residual gas analysis
- Easy operation
- Bake out possibility for high and ultra high applications

Our Solution:
- High sensitivity residual gas analysis allowing the detection of smallest traces of contaminants or process gases
- Product range with solutions for 100, 200 or 300 amu
- Simple residual gas analysis is possible even without connection to a computer
- Intuitive operated LEYSPEC software, integrated display
- Key gases can be displayed at the push of a button, a spare display channel for additional gases is available
- Preinstalled functions, like Helium leak test, warnings and error levels for selectable gases, degassing function after start or venting
- Compact in size and mountable in any orientation for enhanced flexibility
- Bake out temperatures of up to 300°C for gas analysis in harsh environments
Vacuum Systems

Engineering

Vacuum solutions and systems of all kinds from the leading worldwide supplier. Benefit from our 168 years of experience.

Your Expectations:
- Comprehensive consulting service
- Customer specific application support
- Design and manufacturing of custom vacuum solutions
- High flexibility and reliability
- Efficient solutions

Our Solution:
- System solutions - tailor-made concepts based on customer specifications
- Integrated forevacuum and high vacuum pump systems for custom requirements
- Worldwide engineering, production and service centers
- Global project coordination
- Custom software programming and customization
- Constant product improvements and innovations
- On-site commissioning and training

RUTA Vacuum Systems

Multistage forevacuum systems

Reliable process engineering solutions from over 150 years of experience in designing customized vacuum systems and custom controls.

Your Expectations:
- Professional consulting
- Design and delivery of demand-oriented and optimized vacuum systems
- Reliable engineering solution

Our Solution:
- Custom designed forevacuum pump systems
- Oil-sealed/dry compressing
- Pumping speed and ultimate pressures adapted to the process
- Additional high vacuum stages facilitate operating pressures down to $10^{-7}$ mbar
Product Overview 2019
Central Vacuum Systems

CVS
Central vacuum stations

Modular systems for improved operational reliability in frequent varying vacuum consumptions. Delivery of turnkey ready-to-operate and tested units.

Your Expectations:
- Industrial grade vacuum generator
- For covering demands of numerous small vacuum consumers individually and simultaneously
- Excellent vacuum performance data
- Modular design for customizing to customer specific processes

Our Solution:
- Typically consisting of SOGEVAC pump(s), buffer vessel, electrical cabinet with controller, all connecting components
- Pumping speed 25 to 840 m³/h
- Ultimate pressure ≤ 0.5 mbar
- Vessel volume 60, 160, 300, 500 or 1,000 liters
- Electric power from 0.8 to 18.9 kW
- Control type BASIC or Full Featured
- Low cost of ownership

VACUBE
Central vacuum stations

Compact systems for vacuum generation on demand in industrial rough vacuum applications. Efficient and productive with long maintenance intervals.

Your Expectations:
- Industrial grade vacuum generator
- System solutions to cover varying vacuum demands
- Set point operation
- Simple operation

Our Solution:
- Highly efficient oil-sealed rotary screw technology
- Pumping speed 420 to 1,620 m³/h
- Ultimate pressure ≤ 0.35 mbar
- Integrated frequency inverter for load depending speed control
- Sustainable power saving due to on-demand vacuum generation
- Controller with intuitive menu navigation for configuration and control
- Small footprint – pallet size dimensions
- Programmable operation modes
- Plug and play system set up
- Long maintenance intervals
High vacuum pump systems

**TURBOLAB**

High vacuum pump systems

Plug-and-play high vacuum pump systems based on well-proven components. Different configurations available cover individual vacuum demands.

**Your Expectations:**
- High vacuum pump systems for industry and research
- Oil-sealed or dry compressing forevacuum pumps for a hydro-carbon-free vacuum possible
- Compact and user-friendly solution

**Our Solution:**
- Pumping speed 78 - 400 l/s provided by the TURBOVAC i pump range
- Ultimate vacuum down to $10^{10}$ mbar
- Completely preassembled units with turbomolecular pump, TPU display power unit, frequency converter and forevacuum pump
- Easy to relocate pumps out and away from the frame
- Backlight display in the innovative TPU power unit
- Covering a wide range of applications with a full range of high vacuum and dry or wet forevacuum pumps
- Integrated data logger and webserver for system control, monitoring and configuration
- Connection of up to six accessories and two gauges
- Benchmark design, reliability and functionality

**UNIVEX**

Experimentation and coating systems

Easy operation and accessibility of vacuum chambers. Manual or automatic process control and documentation.

**Your Expectations:**
- Flexible laboratory systems for vacuum coating
- Systems for university and industrial research
- Results transferable to large scale systems or serial production
- High reproducibility degree

**Our Solution:**
- Multipurpose systems for the production of functional layers
- Modular system configuration, wide range of accessories
- Customized system solutions
- Variable chamber sizes
Product Overview 2019
Calibration Systems
Controllers for Vacuum Systems

Calibration Systems CS
Custom vacuum calibration systems

Process reliability by regular checks, adjustments and recalibration of vacuum gauges and sensors.

Your Expectations:
- Checking the characteristics of vacuum gauges
- Precise calibration of vacuum gauges in accordance with DAkkS (national accreditation body for the Federal Republic of Germany)
- Ensure reproducible parameters

Our Solution:
- Universal calibration systems with a special vacuum chamber, turbo-molecular pump system, vacuum gauges and additional components depending on the calibration pressure (heating jacket, separate pump system for admitting gas, et al.)

Controllers
Innovative pump and system management

Tailor-made controllers and control systems adapted to customer and process requirements for optimum performance and user convenience.

Your Expectations:
- Customer specific system interfaces
- Simple to complex visualization
- Power distribution integrated within the system
- Convenient control of all system components

Our Solution:
- Control and data acquisition of system parameters via digital I/O interfaces or bus systems, Ethernet, Profibus, RS 232, WiFi, GSM, for example
- Implementation of custom software programming
- Simple digital display via touch panel up to visualization on mobile devices (via apps)
LEYCON
Valves in different design types and driving modes

Reliable valve technology, widely used in a broad range of applications.

Your Expectations:
- Reliable leak tightness
- High number of actuations
- Simple to fit and remove
- Delivery from a single source

Our Solution:
- Manually actuated valves
- Valves with electromagnetic/electropneumatic drive
- Gate valves
- All-metal valves for UHV systems
- SECUVAC safety valves
- Special valves, such as vacuum lock and sealing valves, venting valves, leak valves

Flange systems
Connection components

Well proven and widely used technology. Almost any connection possible.

Your Expectations:
- Simple to fit and remove
- Reliable leak tightness
- High class materials, top quality
- Delivery from a single source

Our Solution:
- ISO-KF style small flanges in sizes DN 10 to DN 50
- ISO-K flanges in sizes DN 63 to DN 630
- CF flanges in sizes DN 16 to DN 250
LEYBONOL
Vacuum oil, pump fluids and special lubricants

Broad product portfolio for every application in practical container sizes. Guaranteed, constant quality for a long pump lifetime.

**Your Expectations:**
- High quality lubricant with long lifetime
- Excellent vacuum performance
- Reliable pump fluids for diffusion pumps

**Our Solution:**
- Special vacuum oil for highest demands, qualified according to proven standards
- Mineral, Ester, PAO special synthetic and PFPE oils for exchange intervals up to 3 years in clean applications
- Ongoing quality monitoring
- Oil analysis services for process control and optimization

Leybold Academy
Vacuum technology seminars/training center

Qualified training of your staff by practical knowledge transfer. Provides best possible performance and equipment uptime.

**Your Expectations:**
- Understand vacuum technology
- Get practical and hands-on oriented training

**Our Solution:**
- Systematic training covering the entire spectrum of vacuum technology
- Basic seminars for technicians as well as non-technical employees
- Advanced seminars
- Leak detection seminars
- Personnel qualification seminars according DIN EN ISO 9712 for NDT method leak detection level LT1 and LT2
- Practical seminars
- Customized seminars, tailored to your individual needs
Spare Parts
Genuine wear parts and consumables

Original spare parts for long and trouble-free operation.

Your Expectations:
- Guaranteed availability
- Highest manufacturer quality
- Short delivery times

Our Solution:
- Range for all commonly requested spare and wearing parts, widely available in practice-oriented parts kits
- Spare parts are subject to the same rigorous quality requirements which apply to our pumps

After Sales Support
Services

Reliable original equipment manufacturer service from one source.
Easy, competent, reliable

Your Expectations:
- Global availability of service
- Short downtimes
- Fair repair charges

Our Solution:
- Range of service that accompanies your vacuum equipment over the entire life cycle
- Tailor-made service concepts and contracts
- Maintenance and repair, on-site or at a Leybold Service Center
- Commissioning and training
- Exchange and backup pool
- Calibration of measurement systems
